- In case of loss, after scanning the QR Code, sending real-time notifications and alerts via email of emergency contacts.
- Geolocation.
- Compatible with any smartphone with a QR Code scan enabled camera.

### Activation procedure

#### STEP #1

Buy a product from the ICEPRO line and download the official App for your mobile device (compatible with Apple iOS and Android platforms).

Or frame the QR Code on the product (each smartphone has a scanned camera) and follow the activation instructions on the web page.

#### STEP #2

Register on this portal by clicking on Sign in, create a personal account (following the instructions) or use your Google or Facebook account. Enter the activation code printed on the card inside the package where required. At this point, your account is associated with the product and is active.

#### STEP #3

Fill in the available fields with data, enter contacts and emergency information. You can always update them whenever you want through the App or the website.

**IMPORTANT:** Each contact you enter will receive a personal e-mail that will inform you directly of the registration.
